Professional Summary

Dedicated and detail-oriented Software Developer with expertise in full-stack development and system optimization. Adept at designing scalable solutions while maintaining high standards of quality. Passionate about leveraging technology to drive organizational efficiency.

Work Experience

08/2023 – Present
Harare, Zimbabwe

Graduate Trainee (Research & Development), City Parking Pvt Ltd

- Engineered a microservice to monitor system uptime and performance, reducing mean time to resolution by 25% and managing 2 servers with automated SMS, email, and WhatsApp alerts.
- Developed a geofencing platform, tracking over 1,000 daily user transactions, identifying anomalies in real-time and improving issue detection by 30%.
- Designed and implemented a performance calculation engine, automating daily scoring for 200+ users and 200+ precincts, increasing deployment efficiency by 40%.
- Built a full-stack asset and device issuance system, managing 300+ hardware assets, improving accountability and reducing asset misplacement by 35%.
- Led frontend development for an ERP system, creating an intuitive UI that reduced user task completion time by 20% across 20+ operational modules.
- Developed a responsive task and asset management frontend, integrating event logging for 500+ tasks daily, improving cross-department tracking efficiency by 25%.
- Created a customer query resolution and performance tracker, logging 500+ client queries per month, improving query resolution speed by 30% and handler performance monitoring.

10/2020 – 08/2021
Harare, Zimbabwe

IT Intern, MorniPac Consultants

- Collaborated with a senior developer to build and maintain 2 PHP and MySQL websites, improving user responsiveness and interface efficiency by 25%.
- Performed digital data recovery for forensic analysis, successfully restoring over 90% of lost or corrupted client data.
- Assisted in network troubleshooting and configuration of routers and switches, reducing system downtime by 30% through proactive maintenance and diagnostics.
- Conducted security audits and implemented best practices that strengthened data protection and minimized vulnerabilities.
- Provided technical support to 20+ internal and external users, resolving issues with an average response time under 1 hour and improving overall system reliability

Education

08/2018 – 08/2022
Harare, Zimbabwe

Bachelor of Science (Honors) in Computer Science,
University of Zimbabwe
Upper Second Class (2.1)

Languages

English | Shona

Skills

Programming Languages
JavaScript (ES6+), C#, Java, SQL,

Backend Development
Node.js, Express.js, ASP.NET Core, ASP.NET MVC, Spring Boot, RESTful API development, server-side logic, microservices architecture

Version Control & Collaboration
Git, GitHub, collaborative workflows, branching & merging, pull requests, code reviews

API Development & Testing
RESTful APIs, Postman, Swagger/OpenAPI documentation, API testing & integration, endpoint validation

Frontend Development
HTML5, CSS3, jQuery, ReactJS, TypeScript, Bootstrap, Responsive Web Design (RWD), cross-browser compatibility, DOM manipulation

Databases & ORM
MySQL, Microsoft SQL Server, MongoDB, Entity Framework, database design, data modeling, query optimization

Project Management & Agile Methodologies
Jira, Trello, Scrum, Kanban, sprint planning, task tracking, backlog management

Code Quality & DevOps Tools
SonarQube, static code analysis, CI/CD pipeline integration, unit testing frameworks (JUnit, NUnit, xUnit, Jest)
